

matplotlib

December 13, 2023

```
[ ]: import matplotlib.pyplot as plt
import numpy as np
# random heights and weights
heights = np.round(np.random.normal(1.75, 0.20, 100), 2)
weights = np.round(np.random.normal(60.32, 15, 100), 2)
year = [1950, 1970, 1990, 2010]
pop = [2.519, 3.692, 5.263, 6.972]
plt.rcParams['figure.dpi'] = 600 # Increase the DPI to 600
```

0.0.1 Scatter plot of two data points

```
[ ]: plt.scatter(year, pop)
plt.show()
```

0.0.2 Line Graph

```
[ ]: plt.plot(year, pop)  
plt.show()
```

0.0.3 Histogram

```
[ ]: plt.hist(heights)  
plt.show()
```
